Task 2 Local pilot demonstration of the integrated system
Fifth training event
(final confirmation of point 4)

Ravenna, july 5-6 2007

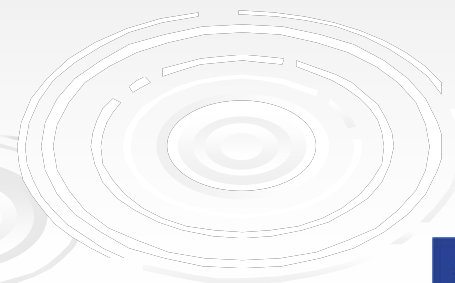

Project realized with the contribution of the European Commission

Point 4 "Data quality"

Proposed requirements

Note: comments are results of discussions and field visits conducted in Mantova, Ferrara, Ravenna

1. **Monitoring system**
(*Sistema di indicatori*)

Field visits and discussion among partners showed that:

It is not always clear the difference between the management of data and the

management of indicators.

key environmental indicators are not always set.⟶They are necessary to evaluate

trends in environmental performance

Proposal: confirmation of requirement

2. Data collection from external and internal sources
(*Raccolta dati*)

Field visits and discussion among partners showed that:

Methodological protocols for data collection are necessary in order to ensure consistency and reliability of information

Data collection processes from industrial sites represent good practice to be worked up in other administration areas as well

Proposal: confirmation of requirement

3. Informative system to manage metainformation
(*Sistema informativo per la gestione dei dati*)

Field visits and discussion among partners showed that:

Either SGA or Environmental Budget implementation needs to be supported by a

Informative System: all developer cities have been building a system to collect main

environmental data

It is necessary to arrange a unique database for different uses within the PA

Proposal: confirmation of requirement
